Technical specification of all Glass Distillation plant For laboratory use

- The unit should be of all glass, single stage vertical type or horizontal type distillation plant useful for all types of laboratory tests.
- Capacity: to produce minimum .5 L/Hr.
- Made of high quality heat resistant borosilicate glass cylinders and tubes and also resistant to minor damages
- Boiler portion made of high purity and good quality borosilicate material along with water level indicator. Borosilicate condenser.
- Heater is of high purity energy efficient (2-3kw) electronic grade transparent quartz/ceramic type.
- Provision for easy cleaning and general maintenance of boiler
- The resultant distillate obtained should be of high quality ultra pure water that is suitable for laboratory use. The pH of the pure water should be lies between 6-7 and the conductivity $< 3 \times 10^6$ S/cm .The water should be pyrogen free.
- Distillate should be free from organic, inorganic and colloidal solids.
- Distillation stand should be of high quality rust free metal with embedded clamps for perfect holding.
- Provided with safety cut-off device.
- Parts should be replaceable

Power Requirements: 220 to 240V, 50 Hz

Atmosphere / Ambiance (air conditioning, humidity, dust ...):

Operating condition: Capable of operating continuously in ambient temperature of 0 to 50 deg C and relative humidity of 15 to 90% in ideal circumstances. an ambient air velocity is less than 0.3 m/s.

User's care, Cleaning, Disinfection & Sterility issues:

STANDARDS AND SAFETY

Performance and safety standards (specific to the device type); Certificates (pre-market, sanitary);

Local and/or international

Should be USFDA / CE/BIS approved product.

Shall meet IEC-60601-1-2

Manufacturer should be ISO 13485 certified
